HYRO A20TR	20W	TRIAC Dim CE driver							
				Features of plug driver: ALL Plug driver can be exchanged in HYRO A1/A2 models directly without tools. Operation is ultra fast within 10 seconds. For example, if you have 30W lamp, when you need 20W, just put 20W plug driver to instead of 30W plug driver, then the lamp is 20W power. So in order to reduce stock, some customers will order 30W whole finished lamp, and buy some 20W 25W and dimmable plug driver for stock.					
CLUA1	CITIZEN LED CHIP for A1	20~30W			2700/3000/4000K @Ra90 available for HYRO A1 (20W/ 25W/ 30W)
